

Managing Mitochondrial Disease: Current Trends & Perspectives

Saturday, March 21, 2015
Ritz-Carlton, Buckhead, Atlanta, GA

Mitochondrial disease is a heterogeneous group of disorders characterized by impaired energy production that affects physical, cognitive, and behavioral functioning. Clinical recognition by primary care clinicians is critical to timely diagnosis and management of patients with mitochondrial disease. **Managing Mitochondrial Disease: Current**

Trends & Perspectives will offer physicians, nurses, and other healthcare providers an opportunity to learn more about practical approaches to care of patients with mitochondrial disorders.

“Mitochondrial dysfunction should be considered in the differential diagnosis of any progressive multisystem disorder.”

--Chinnery PF, 2014

Who should attend:

- primary care physicians
- pediatricians
- nurse practitioners
- nurses
- other interested healthcare professionals

Highlights include:

- Clinical features and “red flags” for diagnosis of mitochondrial disorders
- Diagnostic assessment tools
- Genomic and metabolic testing
- Therapeutic use of dietary supplements
- Best practices in symptom management
- Distinctive needs of autism/Mito co-diagnoses

For more information:

conference@mitoaction.org
888-648-6228

Registration fees:

- \$150 - Physicians
- \$120 - Nurses and other healthcare professionals
- \$50 - Patients and family members
