

Disease	GLUT1 deficiency. Glucose transport disorder. Carbohydrate disorder.
Title	Nico's Story of Epilepsy from Glut1 Deficiency Syndrome.
Link	<a href="https://www.youtube.com/watch?v=71eQhMp12so">https://www.youtube.com/watch?v=71eQhMp12so</a>
Key words	GLUT1 deficiency. Glucose transport disorder. Carbohydrate disorder. Patient/family experience. Symptoms.
Description	Nico is a young boy with GLUT1 deficiency. The video focuses on the epilepsy that Nico experienced from infancy, the parents' emotional struggles around seeing their son suffer, and their struggle to find answers about Nico's condition. The benefit of a proper diagnosis and treatment is obvious. This video includes some striking videos of Nico experiencing seizures in infancy and childhood.
Length (min:sec)	3:45
Speaker(s) Background	Parents. Patient. Medical provider.
Objectives	<ol style="list-style-type: none"> <li>1. Identify GLUT1 as a treatable cause of childhood epilepsy.</li> <li>2. Describe the frustration of parents who don't know what's wrong with their sick child.</li> </ol>
Educational utility	Provides a personal/family narrative about living with the disease but should be accompanied by significant medical teaching to increase understanding about the disorder.
Technical aspects	Excellent audio and video quality.
Relevant/ Target Audience	Health professionals and specialists. Trainees and students in the health professions. Other stakeholders who have an interest in the inborn errors.
Promotional Aspects	This video does promote the work of the Epilepsy Foundation of Greater Los Angeles, but otherwise does not promote a commercial product, treatment, and/or medical device.
